

TABLE OF CONTENT

WHY PLATFORMS	2
PART I. STRUCTURE AND GEODYNAMICS OF PLATFORMS	5
CHAPTER I-1. DEEP STRUCTURE AND GEODYNAMICS OF PLATFORMS	6
CHAPTER I-2. STAGES OF PLATFORMS' DEVELOPMENT	11
CHAPTER I-3. LEADING FORCES OF PLATFORMS' DEVELOPMENT	25
PART II. MAGMATISM OF PLATFORMS ...	34
CHAPTER II-1. TRAPP VOLCANISM	36
Trapps' primary magmas composition	51
Stratified massifs – a key to differentiation of tholeiitic magmas	55
CHAPTER II-2. MAGMATISM OF ULTRAMAFIC-ALKALINE FORMATION	62
CHAPTER II-3. KIMBERLITES AND LAMPROITES	71
CHAPTER II-4. CARBONATITES	101
LITERATURE TO PART II	105
PART III. GENERAL PROBLEMS	110
CHAPTER III-1. MAGMATISM AND STRUCTURE FORMATION	111
Deep-seated faults and volcanic centers' localization	120
Formations of magmatic rocks and tectogenesis	123
Stress field created by magmatic process	127
Problems of silicic magmas formation	140
Mobile belts' spatial localization	146
Vortex structures. Platforms in Earth's rotation field	146
CHAPTER III-2. SOME GENERAL PROBLEMS OF EARTH SCIENCES	146
Episodes of trapp magmatism and biological crises	156
Reasons of biological crises	159
Changing of platform's crust and upper mantle composition	160
CHAPTER III-3. DE RERUM NATURA AND BIG THEORY	161
Geological problems	163
The main faults and the seismofocal zones' nature	164
The nature of transform faults	185
Seismofocal zones' inner structure	199
Seismicity in plates' inner regions	205
LITERATURE TO PART III	214
ACKNOWLEDGEMENT	227
